

Test Case: win/lose function

Test Plan: Select two robots and click duel button,  
Check pop up for match results  
Check if the scoreboard is updated properly

Test Results: Player is able to select 2 robots, and the game doesn't allow you to select a third. The see all bots doesn't function. After you have selected the 2 robots and clicked the duel button a text box that announcing the outcome of the duel says if you won or lose, however the scoreboard will always add one to the lose column.
